REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

An automatic bean curd manufacturing apparatus including a main body provided with a bean grinding chamber and a bean juice heating chamber, a rotational container removably and rotatably installed in the grinding chamber of the main body and provided at an inner bottom with a grinding blade, a rotation suppressing means for selectively suppressing a rotation of the rotational container, the rotation suppressing means being installed in the grinding chamber, a clutch installed on a bottom of the rotational container to rotatably support the grinding blade, the clutch allowing only the grinding blade to rotate when the rotation of the rotational container is suppressed by the rotation suppressing means and allowing both the rotational container and the grinding blade to simultaneously rotate when the rotation of the rotational container is not suppressed by the rotation suppressing means, a grinding container removably installed in the rotational container to grind the beans, the grinding blade installed on the bottom of the rotational container being located in the grinding container, and a heating container removably installed in the heating chamber to heat the bean juice dispensed from the rotational container through a bean juice guide is not taught nor fairly suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
